

**K-jump®**

# Semiautomatic Upper Arm Blood Pressure Monitor

KP-7920

## Specifications

|                     |                                                            |
|---------------------|------------------------------------------------------------|
| Measuring Range     | Pressure: 20~300 mmHg<br>Pulse Rate: 40~200 pulse/min      |
| Accuracy            | Pressure: $\pm 3$ mmHg<br>Pulse Rate: $\pm 5$ % of reading |
| Measuring Method    | Oscillometric method                                       |
| Inflation Method    | Manual inflation bulb                                      |
| Deflation Method    | Manual exhaust valve                                       |
| Display             | Digital liquid crystal display                             |
| Memory              | 42, 85, 99 sets                                            |
| Operation Condition | 5 ~ 40 °C (41 ~ 104 °F), 15 ~ 90 % RH                      |
| Storage Condition   | -20 ~ 55 °C (-4 ~ 131 °F), < 93 % RH                       |
| Power Source        | AAA battery x 1                                            |
| Battery Life        | Around 250 measurements with alkaline batteries            |
| Power Saving        | Auto-off after 150 sec non-operation                       |
| Size                | 82x72x25 mm                                                |
| Weight              | Approx. 56 g including batteries                           |
| Cuff Range          | 22 ~ 32 cm or 32 ~ 42 cm                                   |

Specifications are subject to change for improvement without notice.
