Arm-type Fully Automatic Blood Pressure Monitor VM-44

Product Description

OLEX has applied its high-tech measurement technology to monitoring blood pressure from the arm – all with the push of a button! The automatic memory function records the last 120 measurements in 4 groups for efficient tracking. The Last 3 Results Average feature automatically calculates average readings stored in memory. An Irregular Heart Beat detector automatically alerts user when heart rhythm is either 25% faster or slower than the average rhythm detected during the measuring process.
